Projects in Training at Virtusa

Query Management System (Virtusa My Query) - Core Domain - August 2022 to November 2022	
Role	Developer
Technology	Java 8, Data JPA, Hibernate, MySQL, Spring MVC, Spring Rest, Spring Security
Description	Query Management System is an application where user can create their Query post, add multiple image attachments to their query, add multiple tags to their query. Different users of the applications can search for queries via text search or with the help of tags. They can view the query, and add answers to it. They can upvote or downvote the query post if they found it useful. The creator of the Query posts can mark any answer as correct, which will be visible to all the users. Again, users can upvote or downvote answers for a query. There is a separate section where users can see all of their raised query posts. To use all the features the user has to create an account with the application or else, the user will be limited to some features only.
Responsibilities	- Gathering requirements. - Design the project structures. - Developing project modules. - Module and system testing. - Generating project documents. - Deployment.

Past Experience

Internship at Softflow System Pvt. Ltd. Nagpur (May 2021 to March 2022)	
Role	Flutter Developer
Technology	Flutter, Dart Langauge, MS SQL Server
Description	As part of the internship I was responsible to make the Multiplatform Application.

	To integrate it with the backend. To test the overall working. Communicate directly with the client for updates. I made multiple applications for multiple clients, some of which are for the organization's internal work, and some are on Playstore for public use.
Responsibilities	● Gathering requirements. ● Design the project structures. ● Developing project modules. ● Module and system testing. ● Deployment.
